ABOUT COMPANY

We are a team of specialists with experience in implementing BIM-technologies. We believe that BIM is not a future - BIM is today, BIM is right now.

Our main goal is the most effective application of BIM technologies at all stages of project development.
We always look at project tasks through the lenses of engineering perception, which allows us to be one step ahead.

OUR SOFTWARE SKILLS

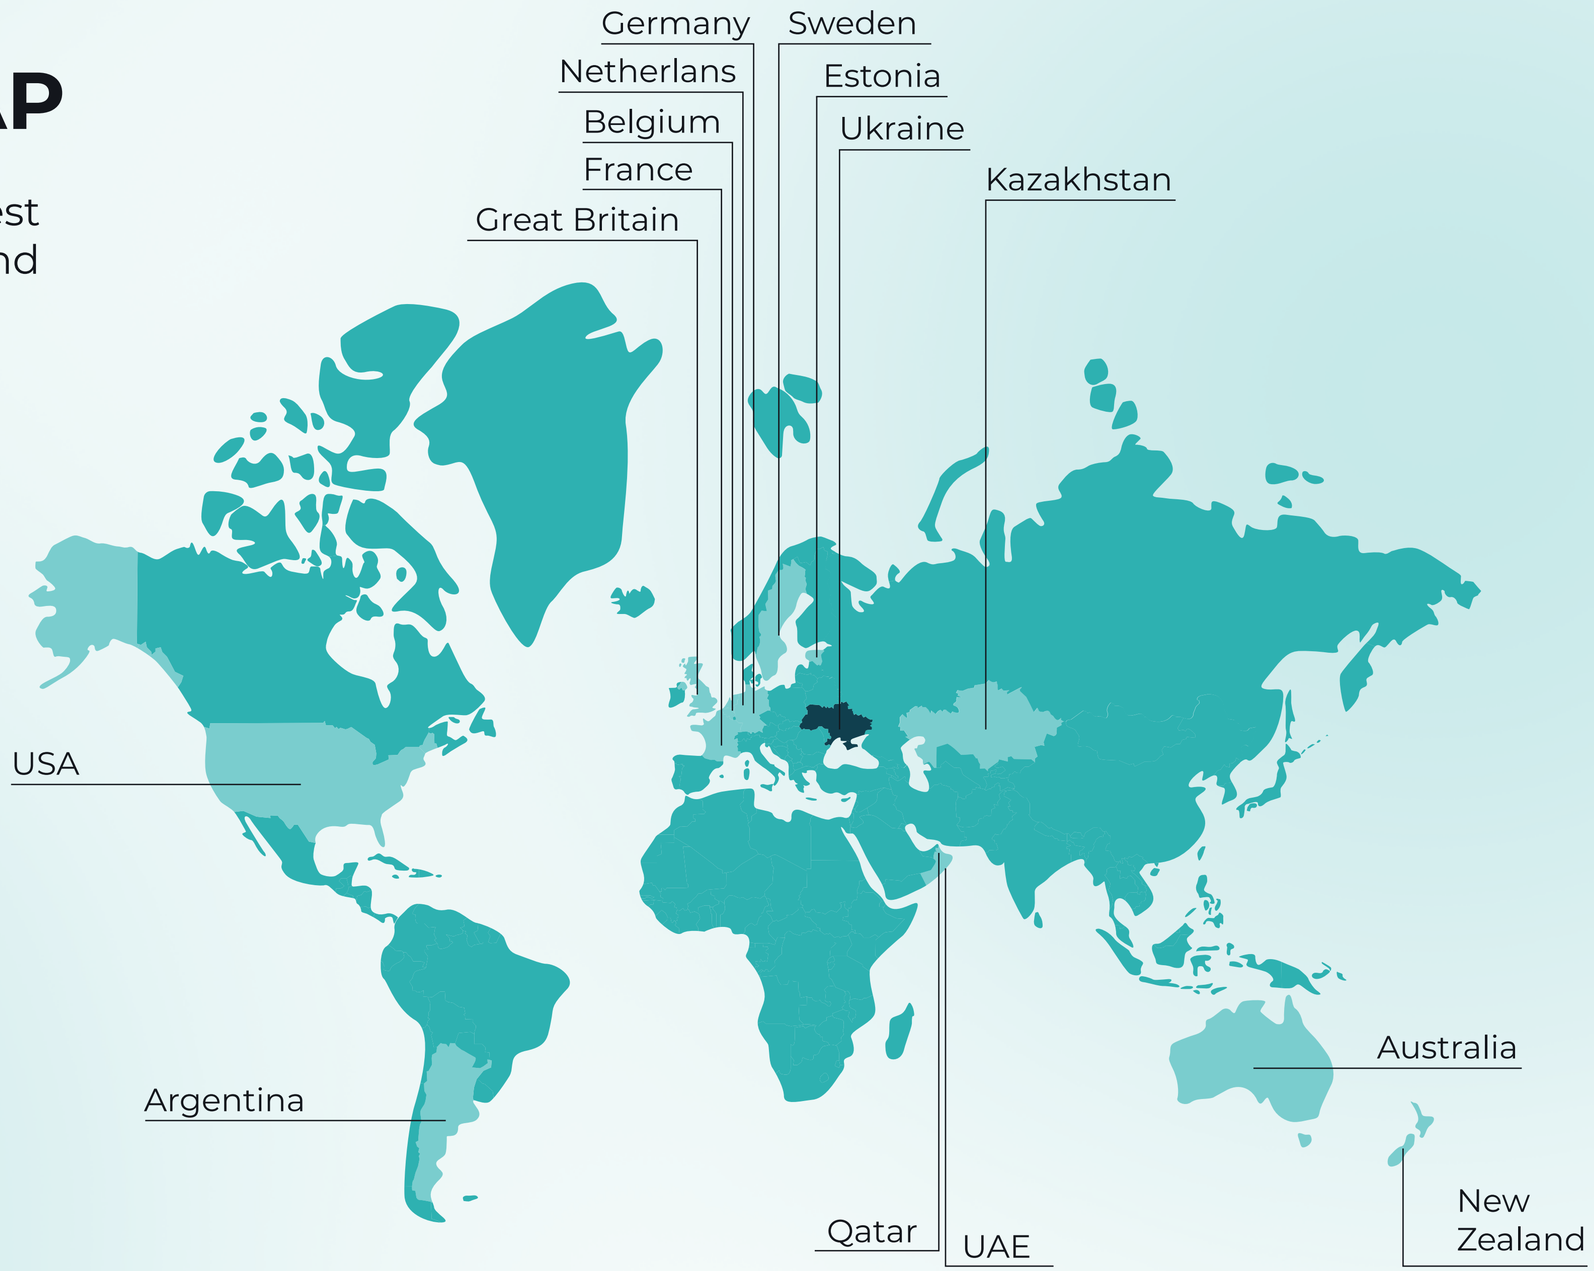
- Autodesk Revit
- Autodesk Autocad
- Graphisoft Archicad
- Autodesk Navisworks
- SketchUp
- Cloud Compare
- Autodesk ReCap
- Rhinoceros

MEET OUR TEAM

When a new member comes to our team we know for sure, that whether they stay with us for long or leave, they will definitely get a precious experience and understanding of what teamwork should look like!

PROJECTS ON MAP

We are the bridge between all the best things in doing projects for clients, and the way of sharing our knowledge for better future of all of us.



SCAN TO BIM SERVICES

AS-BUILT MODEL

Creation of the executive 3D model «As-built» by the Point Cloud. Adding Facilities Management Information to BIM Model Elements.

AS-BUILT DRAWINGS

Design of As-built drawings based on 3D models “As-built”.

ENGINEERING PORTALS

Creation of engineering portals (linked 3D-model, attribute model, documentation, packages).

ANOMALIES

Detection of anomalies of actual placements and sizes of constructions in real life and project documentation.

EXCEPTION REPORTS

Creation of a report on problems in the project.

QA\QC

Checking of model accuracy, building and engineering logic, elements clashing.

WORKFLOW

MODELING PROCESS

1 CONSULTATION

Receiving the task by email, google-form, or during the meeting.

2 PROJECT ESTIMATION

Estimation of the project and creation of an offer

3 ESTIMATION APPROVAL

- Discussion of estimation with the client
- Commercial offer approval

4 PROJECT SETUP

- The creation of chats and dashboard
- Deadline setting
- Team meeting
- Sorting and processing incoming information
- Setting up the template for work

5 WORKFLOW

- modeling
- preparation of drawings and schedules
- step-by-step project review
- daily/weekly reports or meetings with the client

6 MODEL PUBLISHING

- QA\QC in Revit or Navisworks
- Adding missing elements and corrections after QA\QC
- purging unused elements, deleting working views
- delivering model to the client
- getting feedback and approval from the client
- receiving payment

Commercial buildings

Industrial buildings

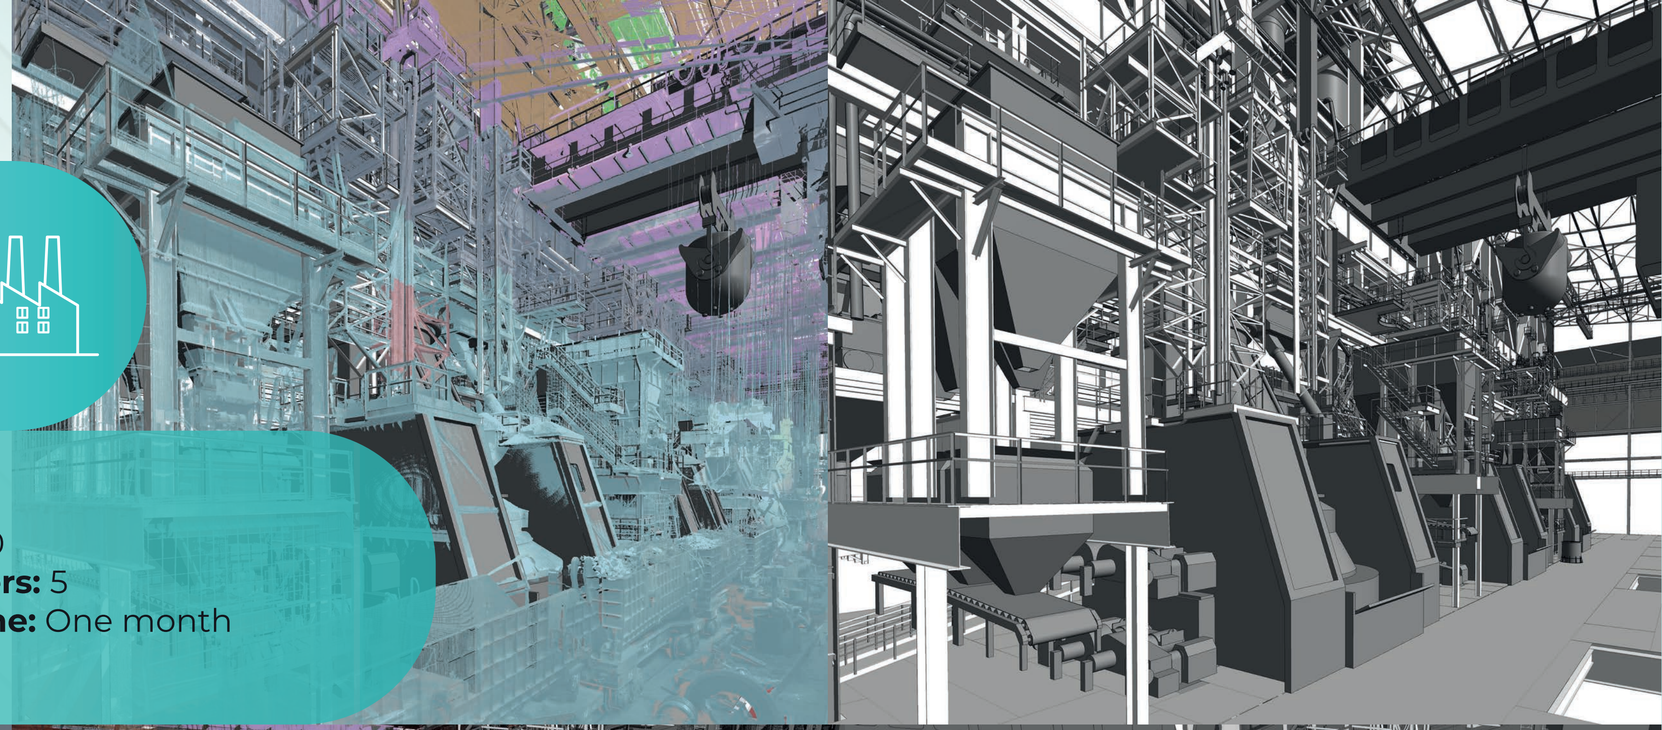
Historic buildings

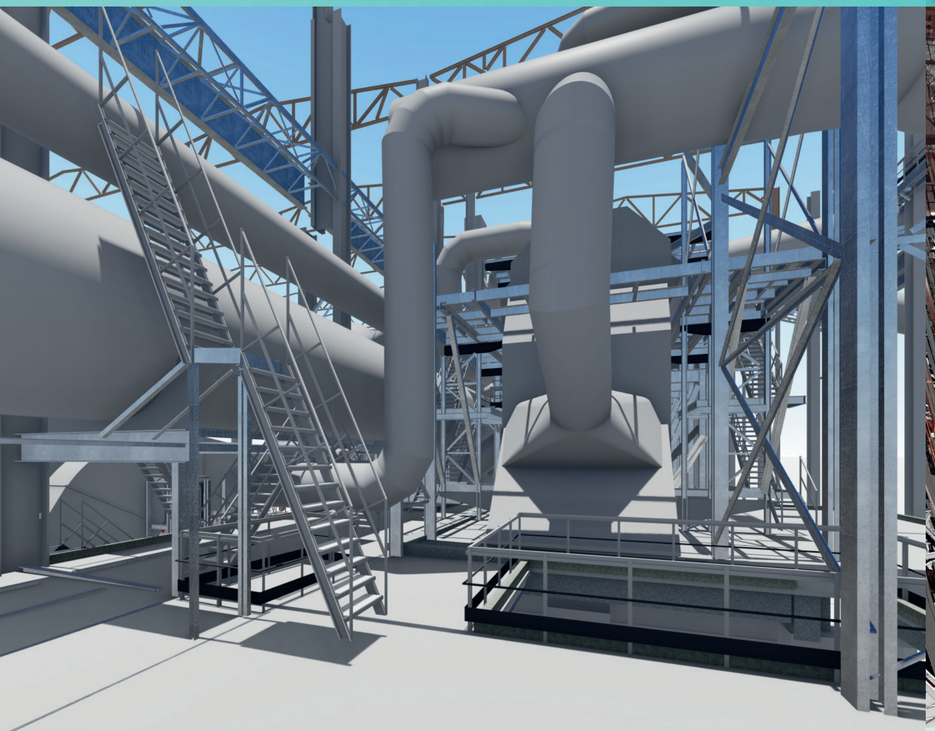
Landscape

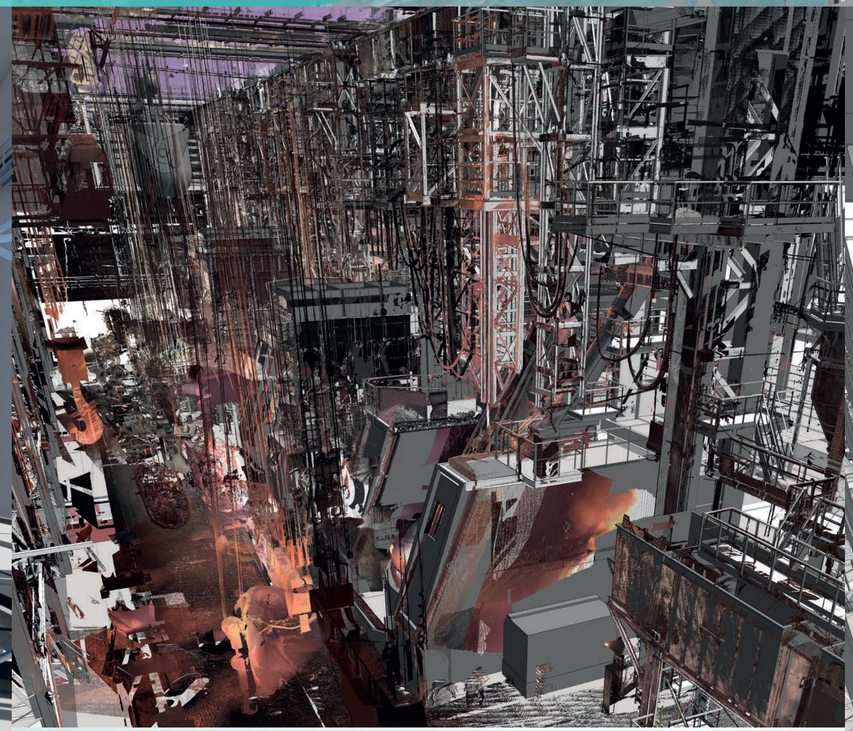
INDUSTRIAL BUILDING

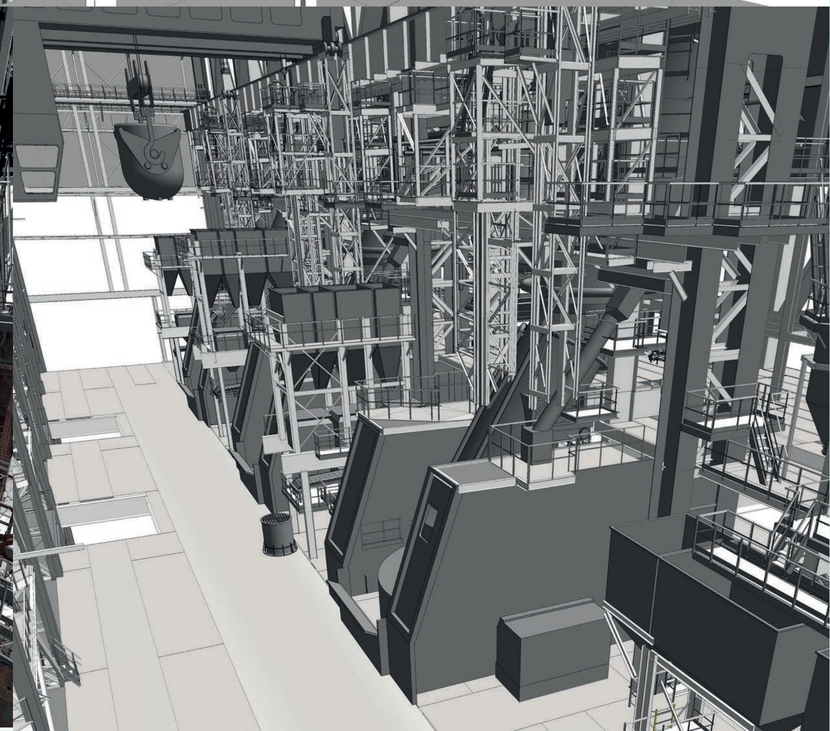
Area: 38950m2
Desciplines: MEP, Structural (process chain and equipment);
LOD: 200

LOA: 30
Modelers: 5
Deadline: One month





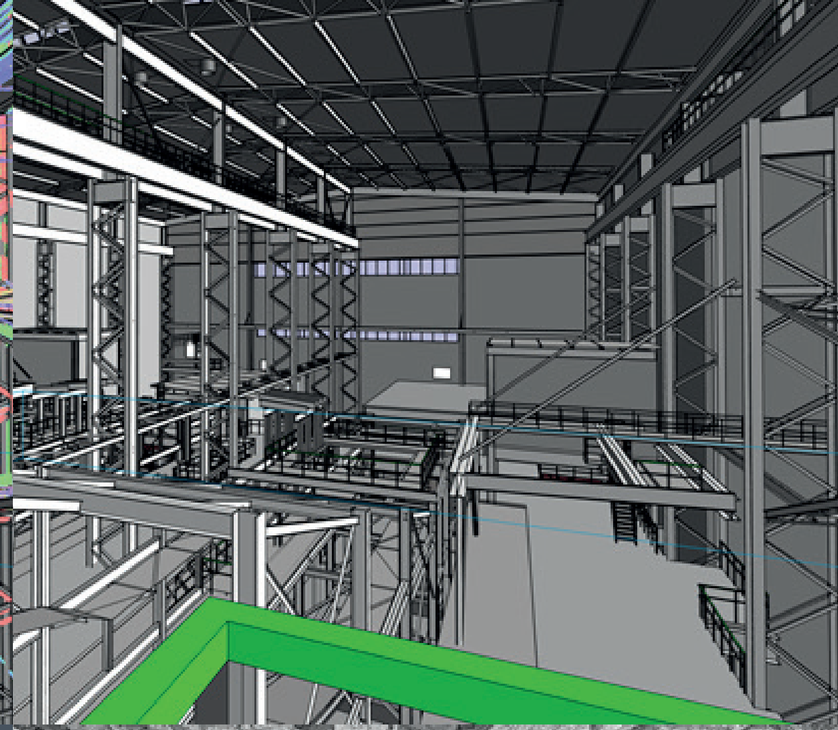


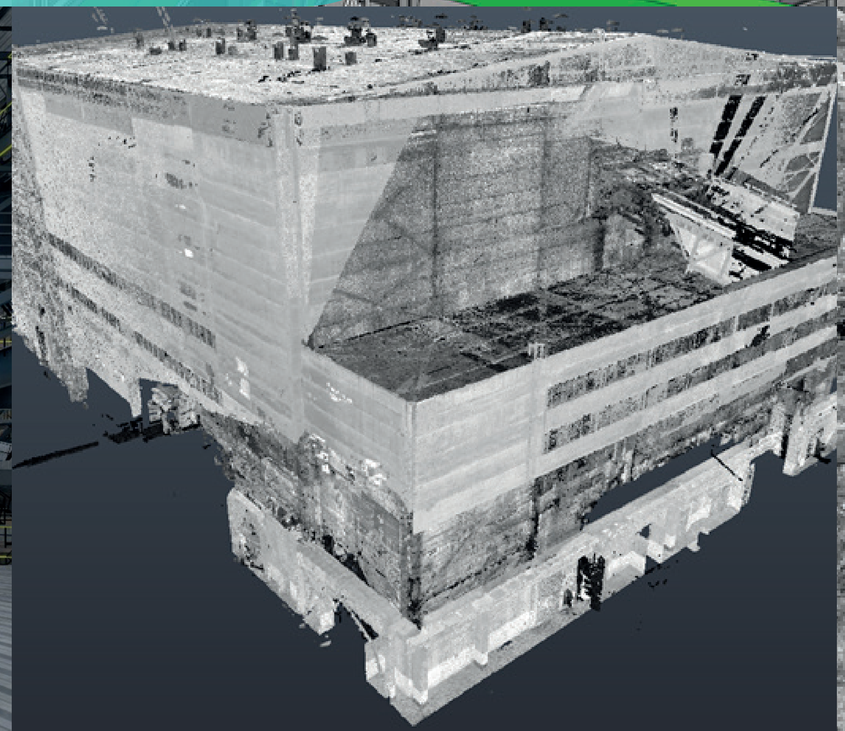


INDUSTRIAL BUILDING

Area: 32100m2
Desciplines: MEP; Structural (process chain and equipment);
LOD: 200

LOA: 30
Modelers: 4
Deadline: One month

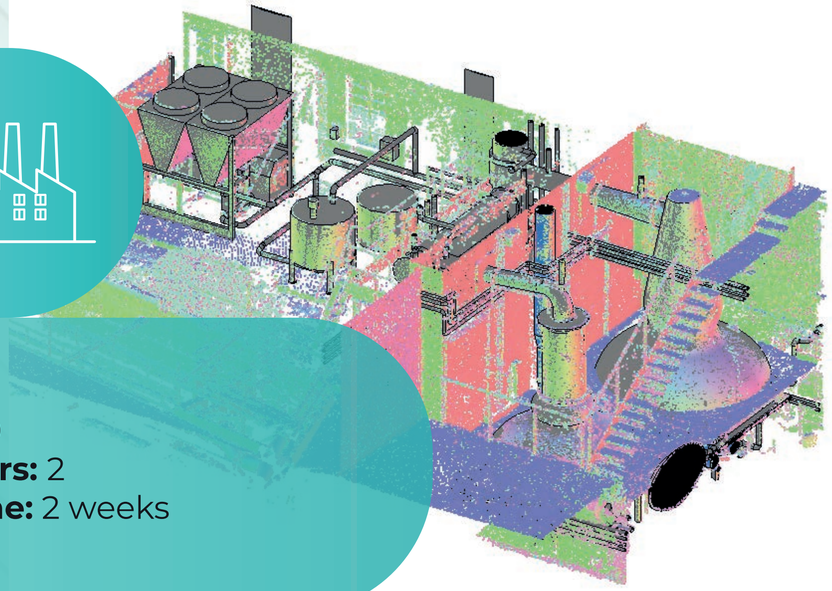


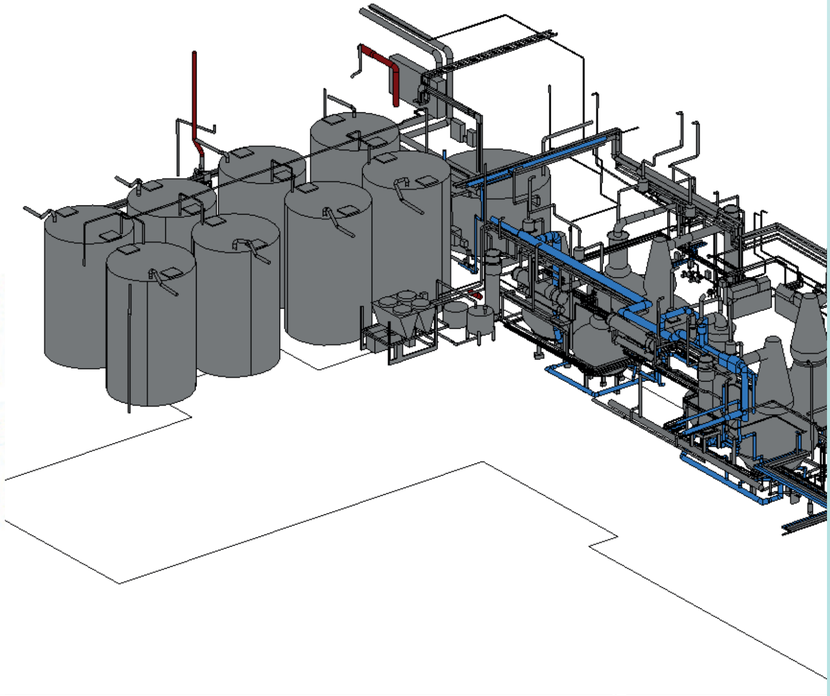


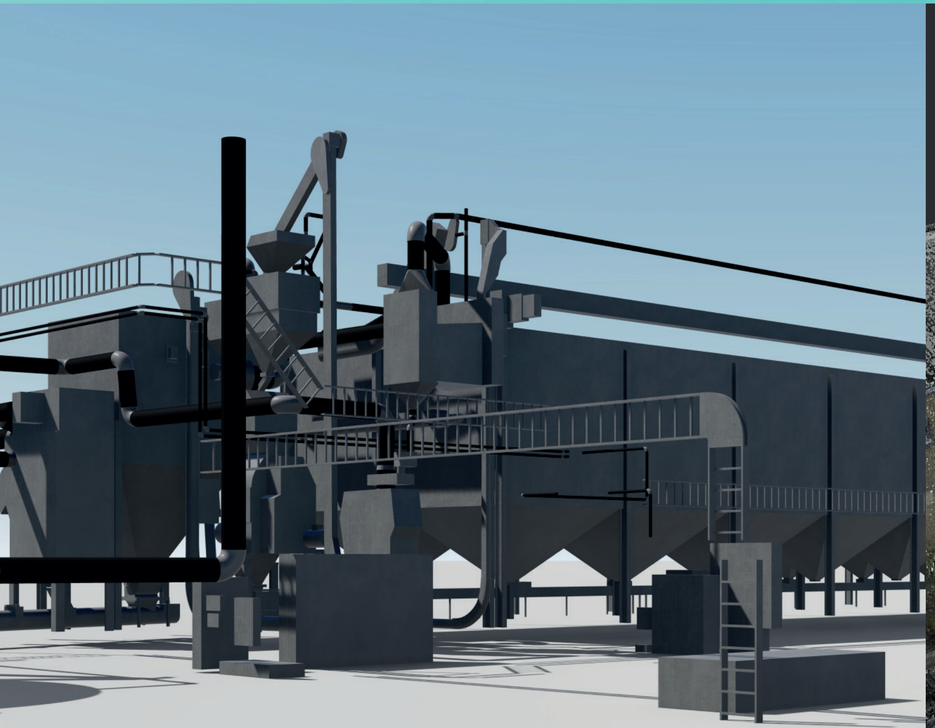
INDUSTRIAL BUILDING

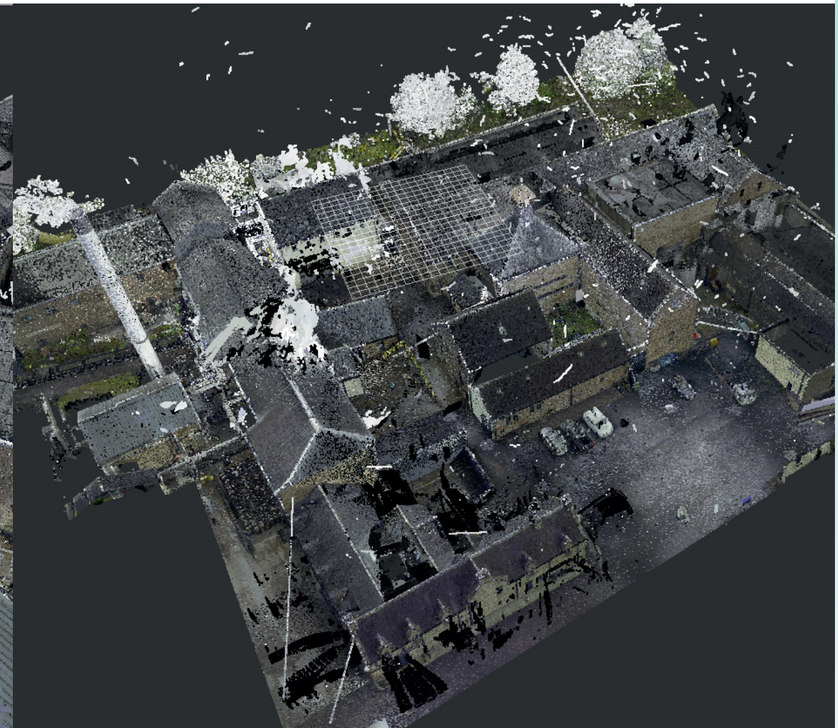
Area: 1985m2
Desciplines: MEP
LOD: 300

LOA: 30
Modelers: 2
Deadline: 2 weeks

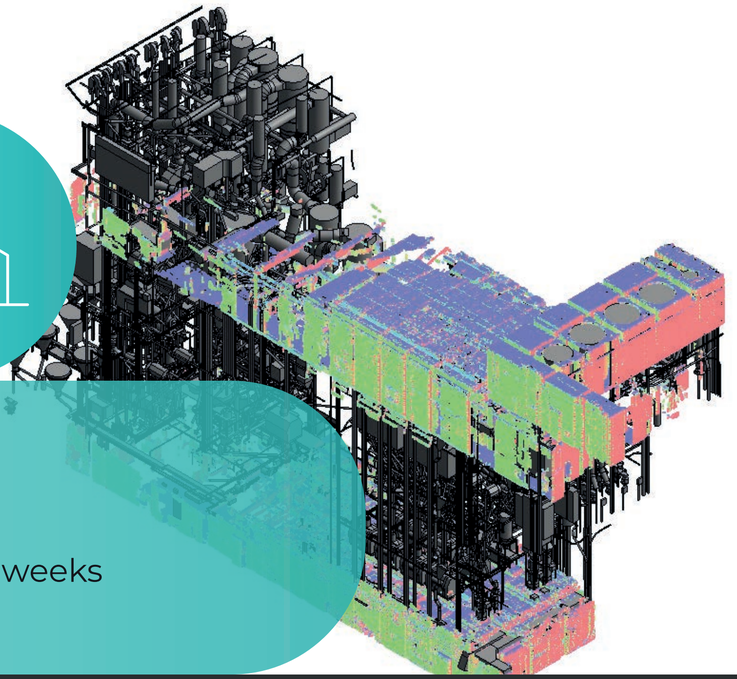


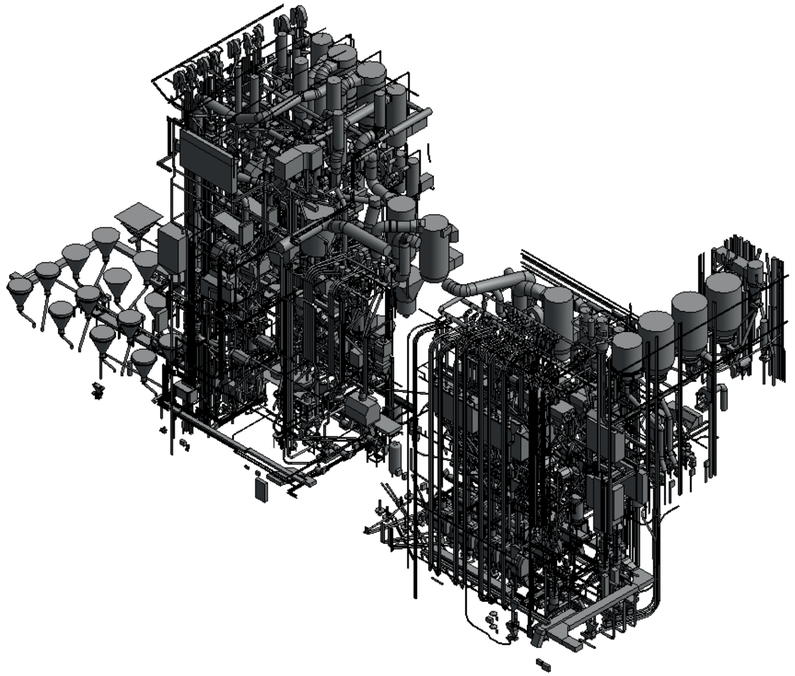






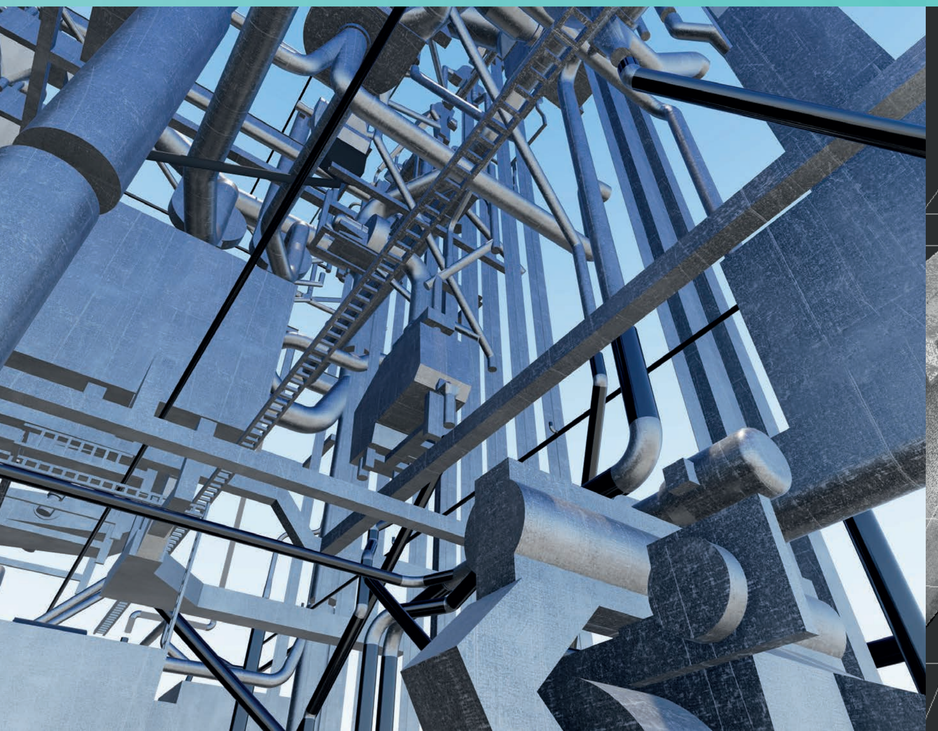
INDUSTRIAL BUILDING

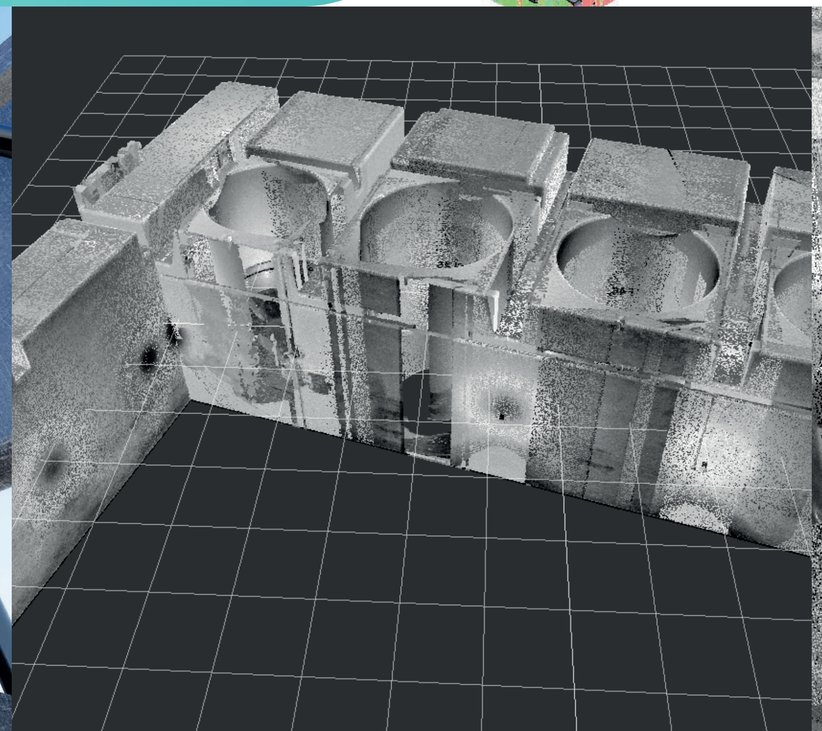


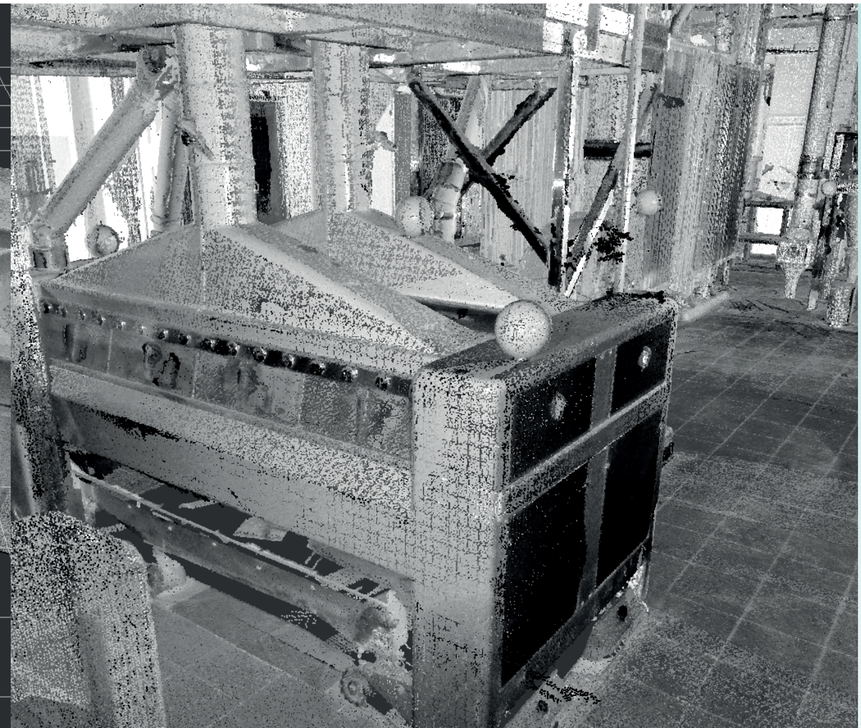


Area: 1276m2
Desciplines: MEP
LOD: 300

LOA: 30
Modelers: 3
Deadline: 2 weeks



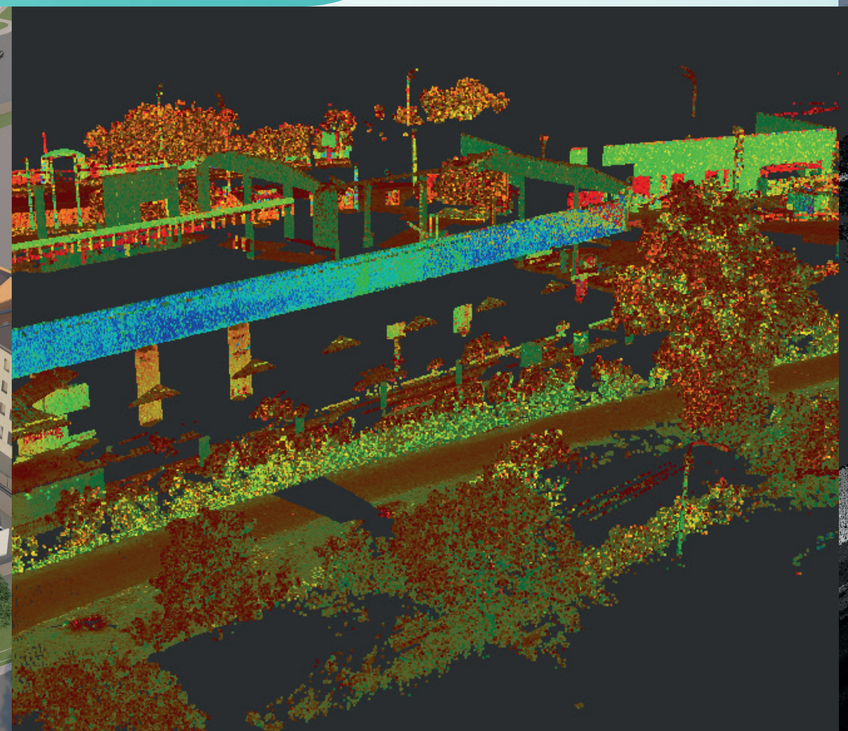




LANDSCAPE

Area: 250000 м2
Desciplines: Topography, Exterior of Buildings
LOD: 300

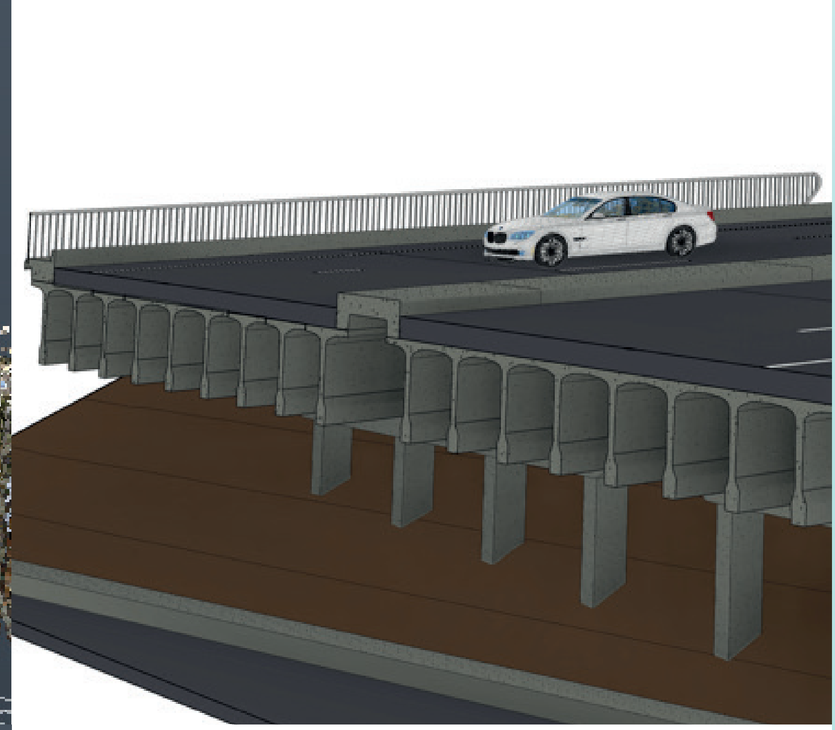
LOA: 30
Modelers: 3
Deadline: One month

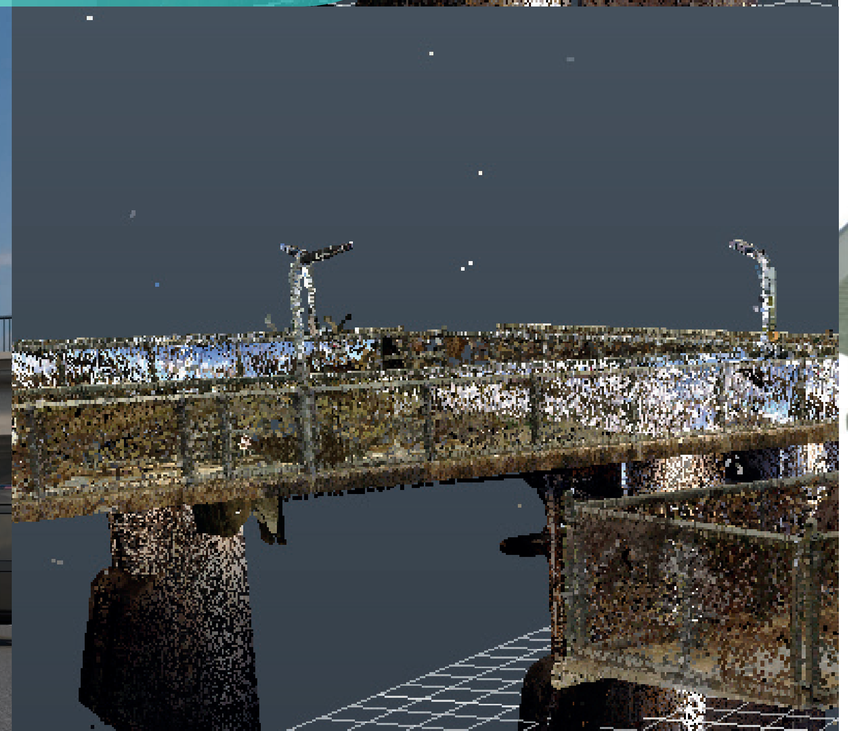


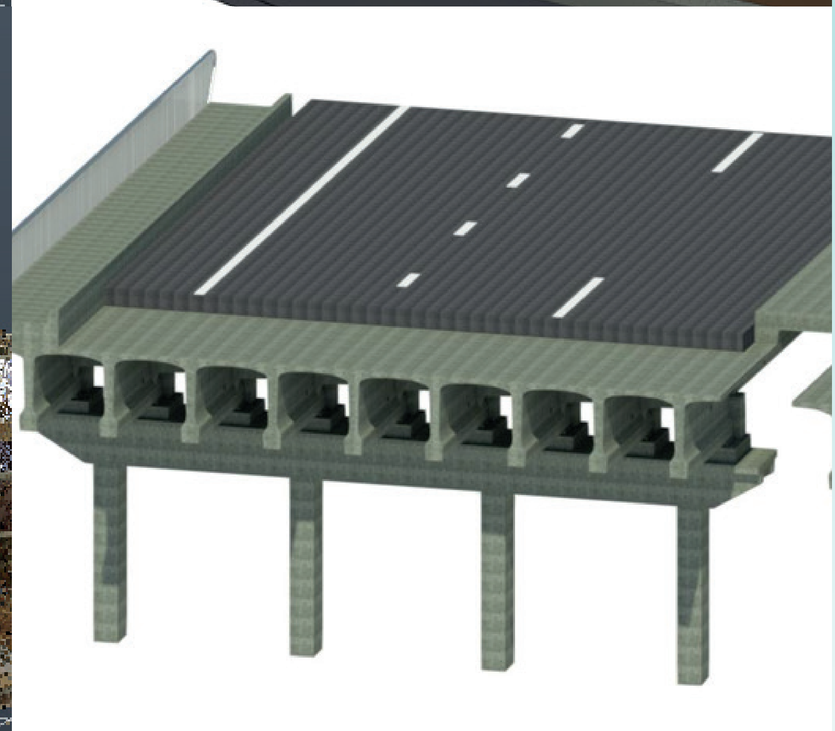
LANDSCAPE

Area: 120000m2
Desciplines: Topography, Structure
LOD: 200

LOA: 30
Modelers: 1
Deadline: 2 weeks



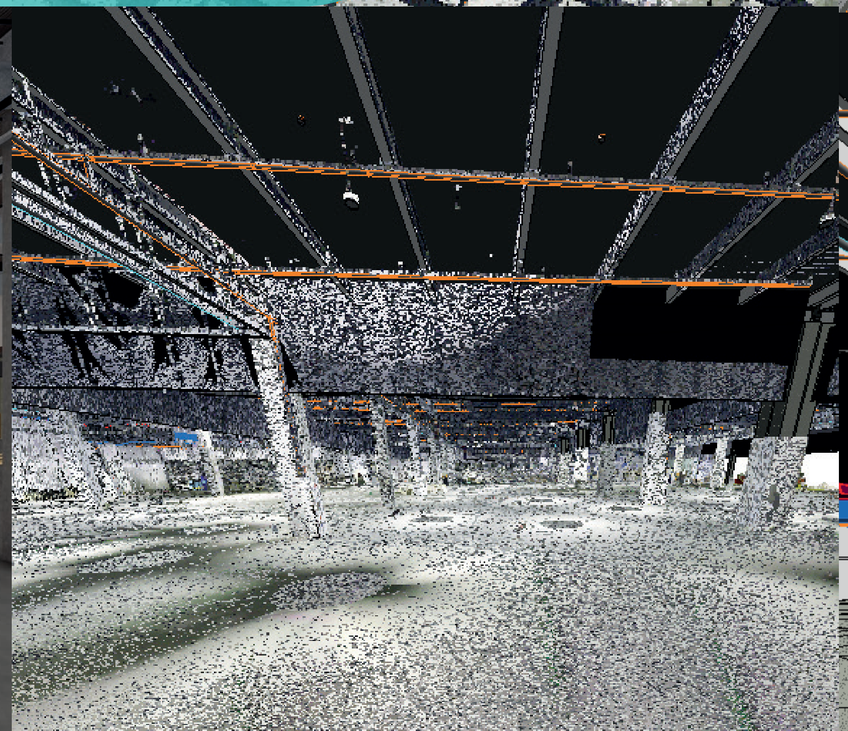


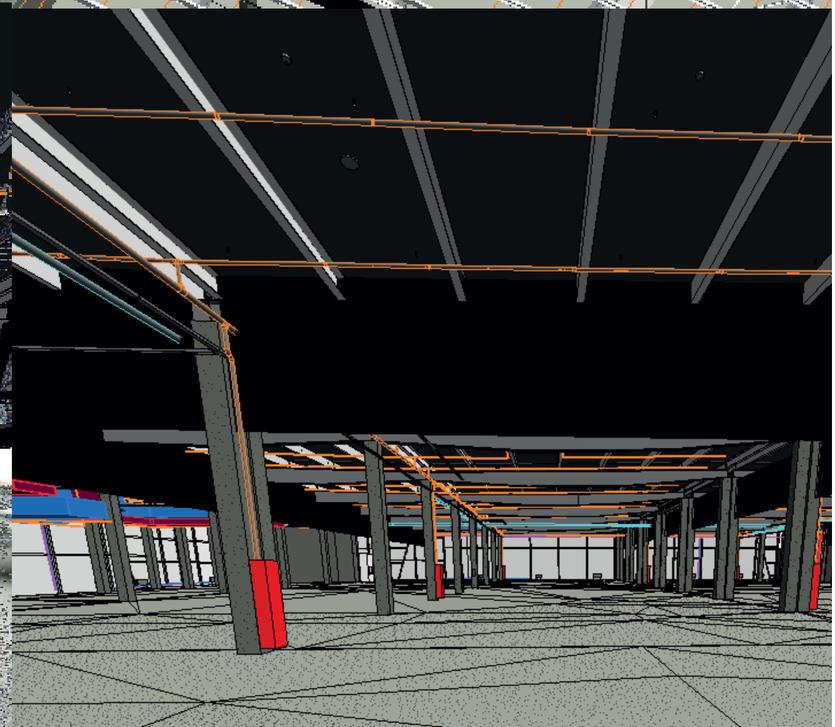


MERCANTILE BUILDING

Area: 9500m2
Desciplines: Architecture, Structure, MEPF
LOD: 300

LOA: 30
Modelers: 5
Deadline: 3 weeks

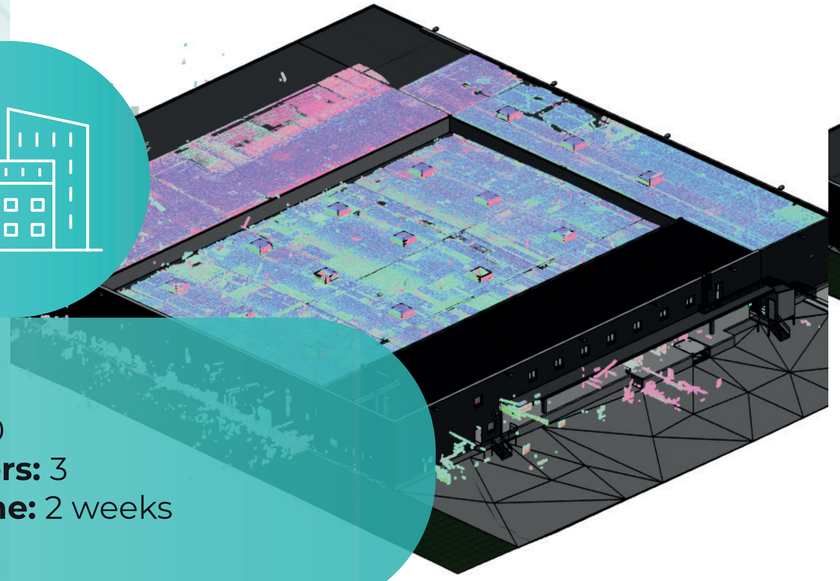


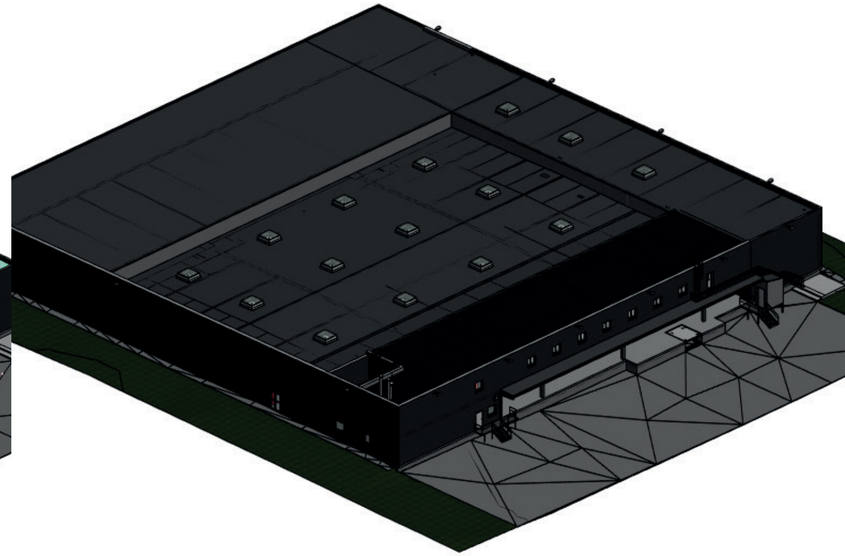


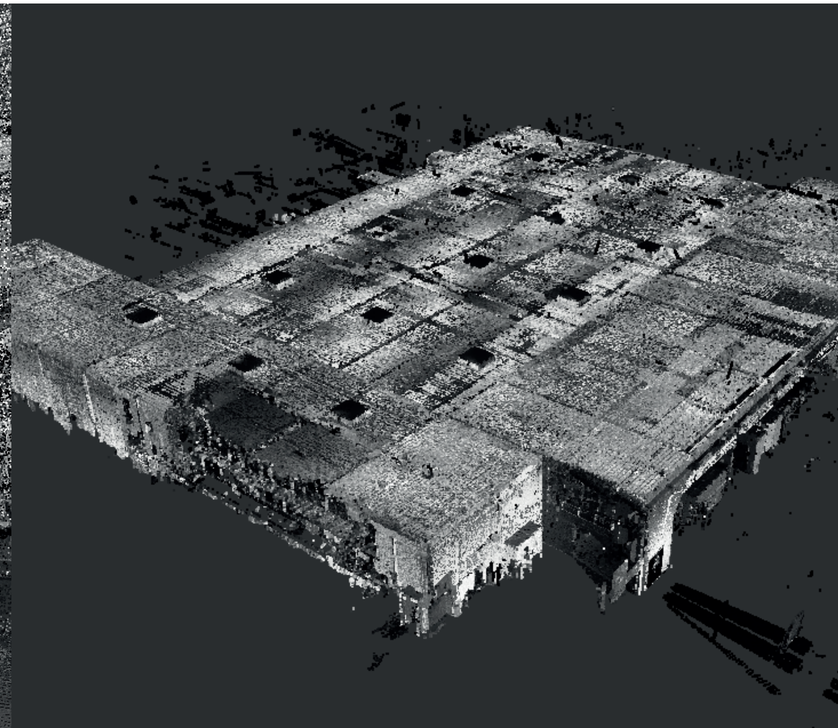
MERCANTILE BUILDING

Area: 7340m2
Desciplines: Architecture, Structure, MEPF
LOD: 300

LOA: 30
Modelers: 3
Deadline: 2 weeks



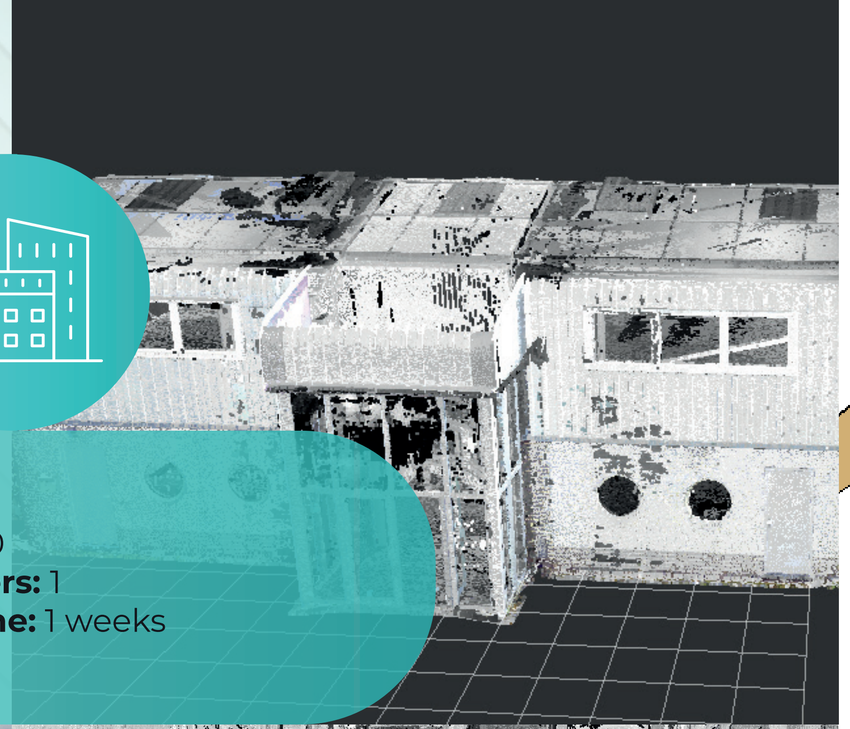


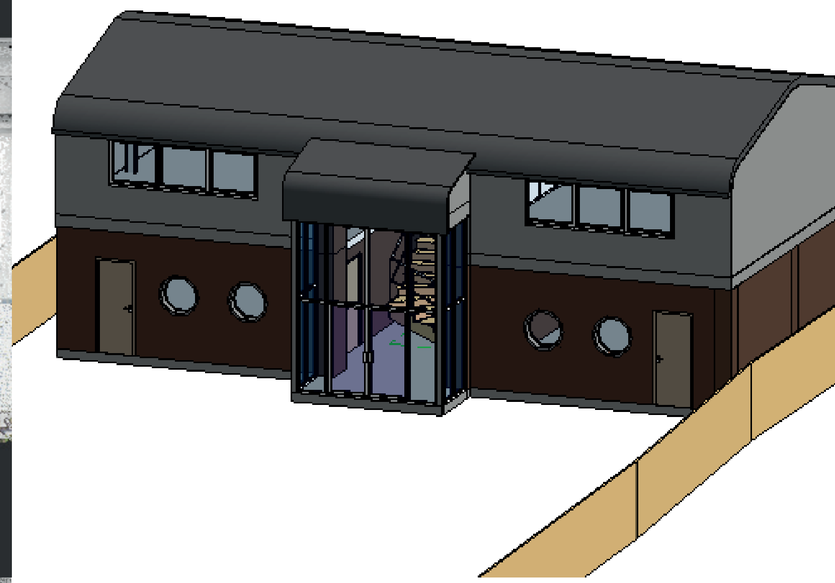


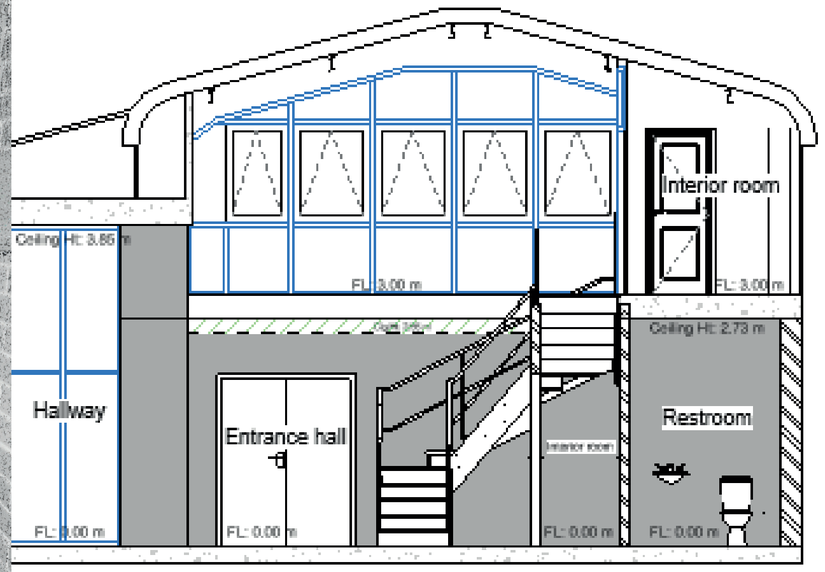
MERCANTILE BUILDING

Area: 240m2
Desciplines: Architecture, Structure
LOD: 300

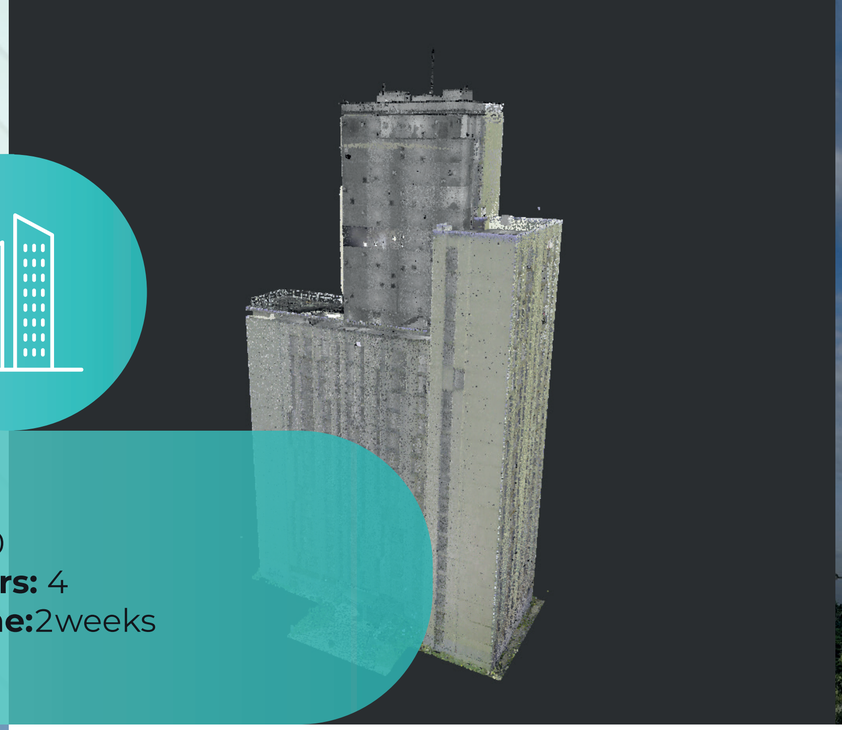
LOA: 30
Modelers: 1
Deadline: 1 weeks





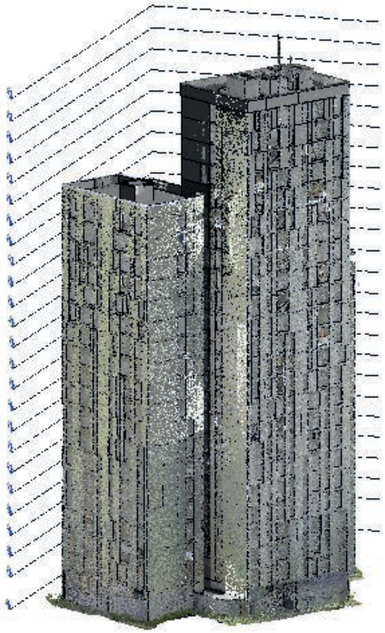


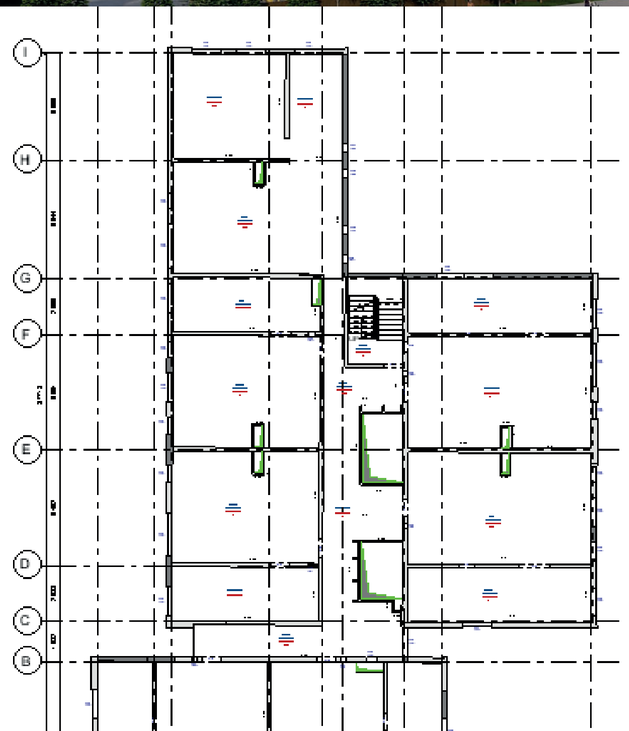
RESIDENTIAL BUILDING



Area: 15350m2
Desciplines: Structure
LOD: 200

LOA: 40
Modelers: 4
Deadline:2weeks

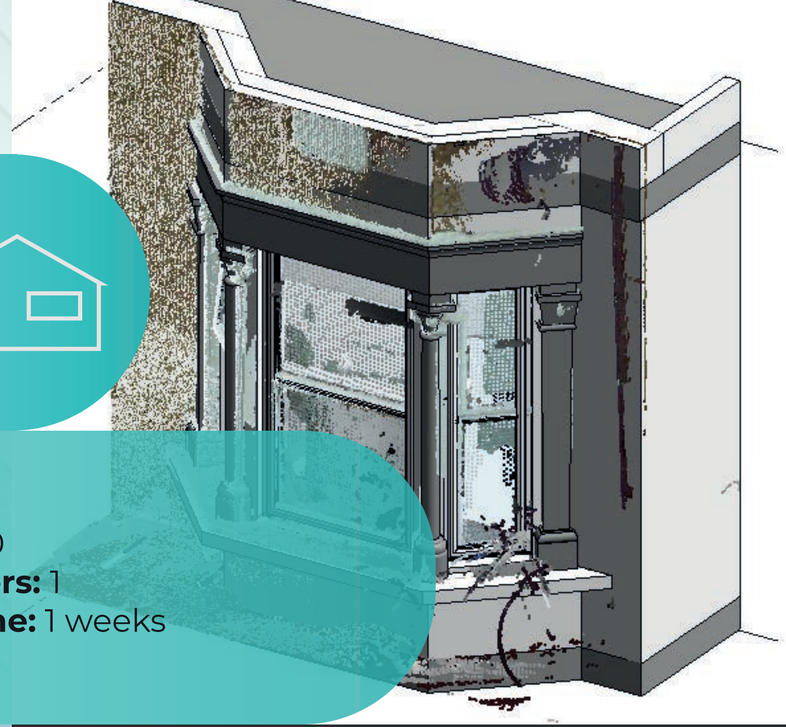


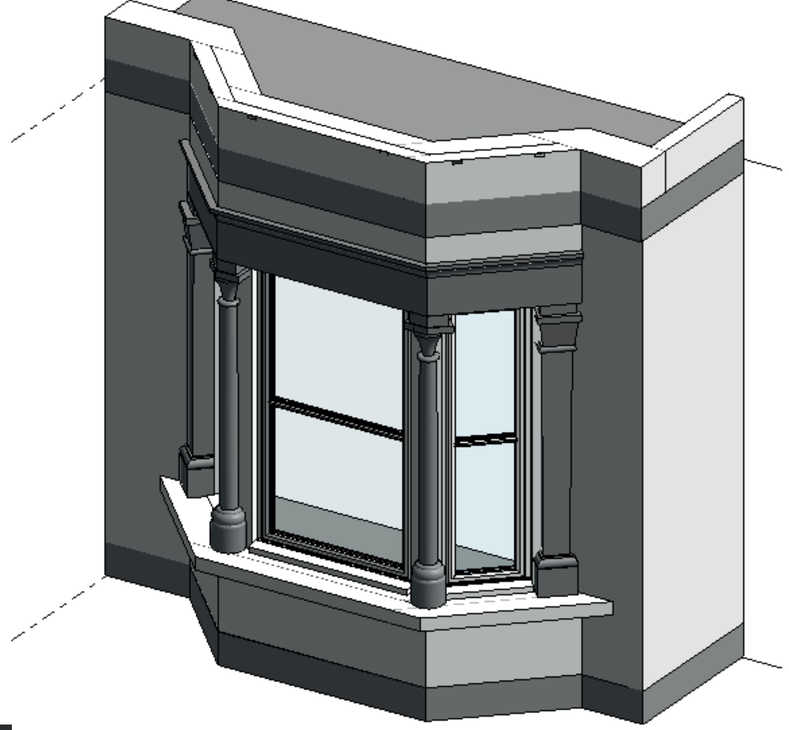


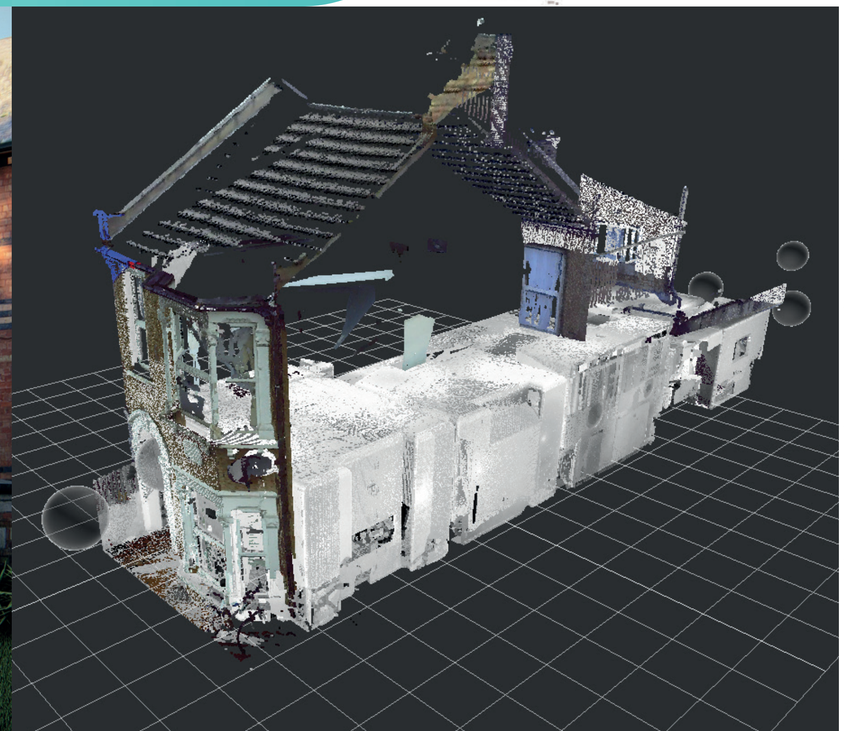
RESIDENTIAL BUILDING

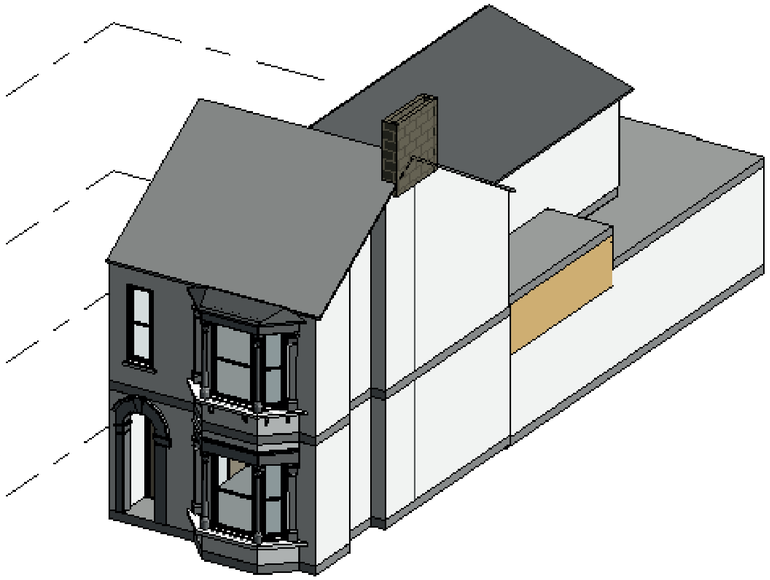
Area: 160m2
Desciplines: Architecture, Structure
LOD: 350

LOA: 30
Modelers: 1
Deadline: 1 weeks





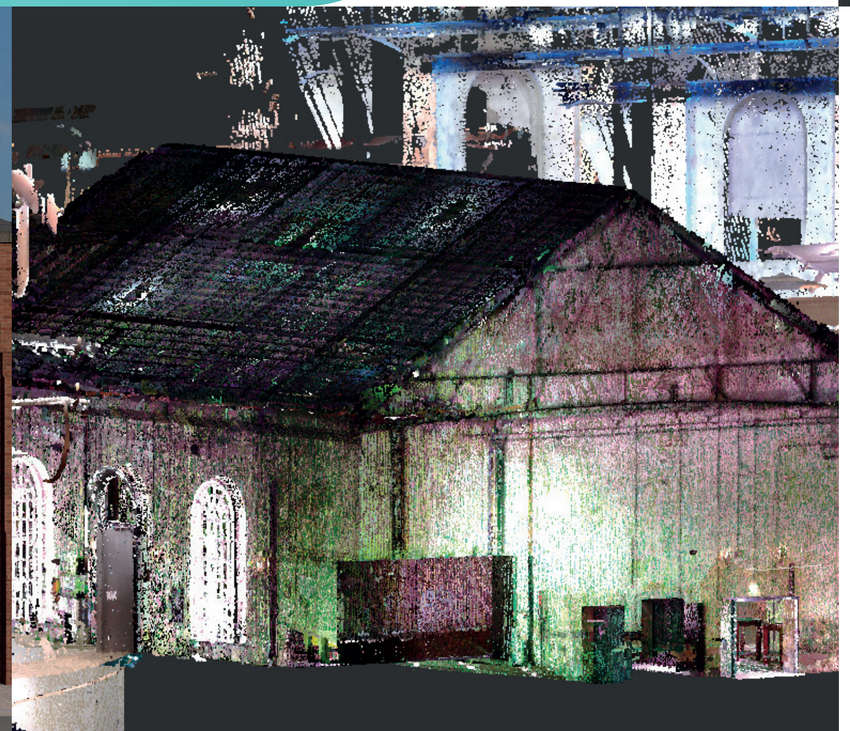


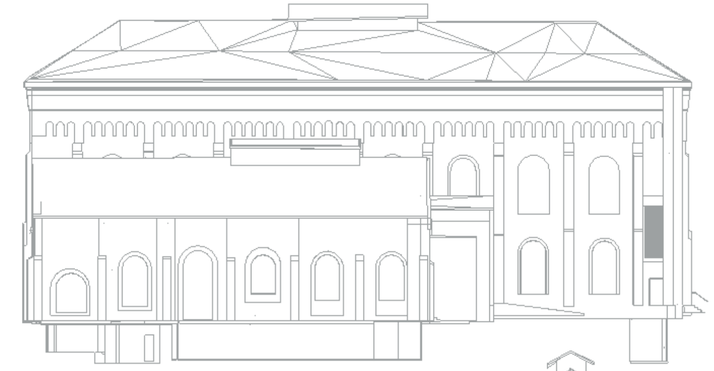


HISTORIC BUILDING

Area: 8300m2
Desciplines: Architecture, Structure
LOD: 300

LOA: 30
Modelers: 4
Deadline: 2 weeks





QUALITY

REVIEWING

- Verification using BIMprove Add-In or check-list

- Checking the 3D model against engineering logic

- Reviewing drawings by customer requirements

DEVELOPMENT

- Continuous development of Add-In and Dynamo Scripts

- Development and constant updating of the template

- Developing parametric families

- Creating our own database

ORGANIZATION

- Unique project management technologies

- Individual approach in communication with the client

- Continuous analysis of the finished work

YOUR BUSINESS DESERVES OUR FIVE-STARS:

HIGHING QUALITY

Elevate your business with high-quality services

COMMUNICATION 24/7

Benefit from constant communication with a dedicated project manager available 24/7

NON-STANDARD TASKS SOLUTIONS

Rely on us for creative solutions to unique and challenging tasks.

QUICK PROJECT ADJUSTMENT

Enjoy quick and seamless adjustments based on feedback.

HELP IN WORK PROCESS ORGANIZATION

Benefit from our expertise in streamlining the work process for optimal organization.
