ABOUT COMPANY

We are a team of specialists with experience in implementing BIM-technologies. We believe that BIM is not a future - BIM is today, BIM is right now.

Our main goal is the most effective application of BIM technologies at all stages of project development.

We always look at project tasks through the lenses of engineering perception, which allows us to be one step ahead.

ABOUT DEPARTMENT

The development department of BIMprove is a team of experts who have mastered the art of working with Revit API, Dynamo, and Python/C# Add-In development. Our team is dedicated to assisting our clients in streamlining their design processes and business.

We aimed to provide complete support and guidance, maintaining transparent communication and regular reporting throughout the process. Our techniques ensure that everyone can comprehend the design with clarity, and our flexibility ensures that we can cater unique needs and requirements.

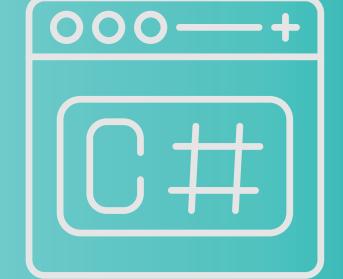

BENEFITS

- 1.** Provide support to quickly solve urgent problems.
- 2.** Help to optimize business processes.
- 3.** Capable of organizing any API connections.
- 4.** Team of engineers with deep understanding of the design process.
- 5.** Strong ability to communicate and work closely with clients to ensure final result meets their needs.
- 6.** Provide detailed planning and drawing schemas to control each step of collaboration.
- 7.** Flexible and adaptable approach to meet the unique needs of each project and client.
- 8.** Strong understanding of BIM standards and how to apply them to projects.
- 9.** Strong attention to detail and focus on quality control to ensure the final product meets or exceeds client expectations.

DEVELOPMENT SERVICES

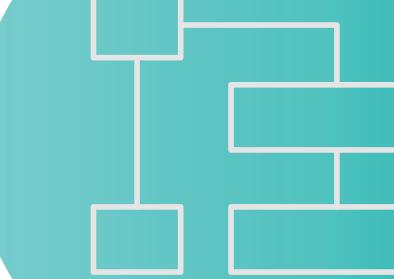

C#/PYTHON ADD-IN DEVELOPMENT

Developing custom Add-Ins for Revit to improve efficiency and add new functionality.

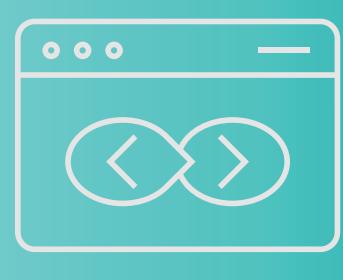

DYNAMO SCRIPTING

Creating interactive visual programming interface to automate tasks, access and modify data, and create graphical representations of the model.

WIDE API CONNECTIONS

Integrating Revit with other software and systems.

SUPPORT AND MAINTENANCE

Providing ongoing support and maintenance for developed tools and scripts.
